

An illustration of three people (two women and one man) sitting around a wooden table in a meeting. The woman in the center is speaking, with a speech bubble above her. The man on the left is listening with his hand on his chin. The woman on the right is also listening. On the table are two laptops, a mug, and some papers. In the background, there is a window showing a landscape with mountains, a lake, and a traditional building under a red sun. A potted plant is on the left.

How can we turn
meeting notes into
a reliable recap?

Meeting Notes

- Jamie drafts FAQ by Friday
- Priya reviews Monday
- Pricing page postponed until legal review
- Legal review owner: Not stated
- Next check-in Tuesday

Recap Prompt Template

Use the following meeting notes to create a weekly recap: {Meeting_Notes}

Decisions

- _____
- _____

Actions (Task | Owner | Due date)

- _____ | _____ | _____
- _____ | _____ | _____

Open Questions

- _____
- _____

What problem are we solving?

3 hours: 50-minute lesson, 10-minute break, 50-minute guided practice, 10-minute break, 50-minute applied practice, and 10-minute wrap-up.

SITUATION

The problem

A team rewrites the same weekly meeting recap from scratch, so important decisions and action owners are easy to miss.

TARGET

Learning goal

Build a reusable prompt with clear input fields and a consistent output format.

Practice material: Use the practice material supplied in the session Markdown.

Use these supplied facts

Do not replace missing information with guesses.

CASE MATERIAL

Practice notes (fictional)

- "Website FAQ update: Jamie drafts by Friday. Priya reviews Monday. Team agreed to postpone the pricing page until legal review. No owner named for legal review. Next check-in Tuesday."

BOUNDARY

Use the supplied facts

A team rewrites the same weekly meeting recap from scratch, so important decisions and action owners are easy to miss.

Concepts for this problem

Keep each concept tied to the practical decision.

UNDERSTAND

Core concepts

- A reusable template separates fixed instructions from changing inputs.
- Placeholders such as {Meeting_Notes} show where a user inserts new material.
- A useful output format states what fields to include and how to handle missing details.
- Reuse saves setup time, but each output still needs review against the source notes.

APPLY

A simple method

- Define the repeated task and audience; add named input placeholders and output fields; test the template and compare its claims with the input.

What makes a prompt weak?

These examples come from the current session scenario.

AVOID

Weak example 1

Summarize this.

AVOID

Weak example 2

Make a complete action plan and assign owners.

A clearer, safer prompt

Keep the source, task, constraints, and output check visible.

USE

Improved example 1

From {Meeting_Notes}, list decisions, actions, named owners, and dates. If a field is absent, write 'Not stated.' Do not infer an owner or deadline.

USE

Improved example 2

Format the result as: Decisions; Action | Owner | Due date; Open questions. Keep names and dates exactly as stated. End with one item needing confirmation.

Exercise 1: Follow the steps

Use the complete case and instructions from the session Markdown.

GUIDED PRACTICE

Exercise 1: Follow the steps

- Turn the supplied notes into the four output sections using Good 1 and Good 2. Check that Jamie owns the draft, Priya reviews it, and legal review has no named owner.

Exercise 2: Try a small variation

Use the complete case and instructions from the session Markdown.

APPLIED PRACTICE

Exercise 2: Try a small variation

- Replace the notes with a new short set from your group's class-planning discussion. Reuse the same template; change only the input. Compare whether the output remains readable and faithful.

How to know the work is complete

Check the output before sharing or acting on it.

SUBMIT

Deliverable

- A reusable prompt card with placeholders, output schema, and one tested result.

VERIFY

Success check

- The template handles missing fields explicitly and does not invent an owner, decision, or date.
