
What skills does this support role actually need?
Junior Customer Support
Key responsibilities
Answer email questions
Record case details
Flag unresolved cases
Key skills for this role
Clear writing
Careful recordkeeping
Interview score guide (1–3)
1 Does not meet the skill
2 Partially meets the skill
3 Meets the skill well

What problem are we solving?

Learn how to use AI for fair hiring documents: give the AI the real duties, link every requirement to a duty, and use the same interview question and scoring guide for every candidate.

THE SITUATION

The problem

Yuna is a manager at a small online shop. She needs a junior customer support assistant. Her root problem is that her job ad did not work: only 4 people applied in three weeks. Her idea is to ask ChatGPT to write a better ad. She asked, "Write a job ad for a junior customer support assistant." The new ad asked for a bachelor's degree, three years of experience, a "young and energetic" person, and a "native English speaker." Only 2 of its 6 requirements match the real duties of the job, and some could unfairly turn away good applicants. The AI wrote a typical ad because the prompt did not include the real duties.

Today's goal and a three-step method

Learn how to use AI for fair hiring documents: give the AI the real duties, link every requirement to a duty, and use the same interview question and scoring guide for every candidate.

STEP 1

Give the AI the real duties

Paste the duties and the required and not-required lists. Tell the AI to use only them.

STEP 2

Link every requirement to a duty

Ask the AI to name the duty after each requirement. Remove any requirement with no duty.

STEP 3

Use one question and one scoring guide for everyone

Ask the same job-related question to every candidate and score only what the answer shows.

Job facts: Junior Customer Support Assistant

Fictional data created for this class. File: data/session_3_3_job_facts.csv

Type	Item	Detail
Duty	Answer customer email questions	About 60% of the time
Duty	Record case details in a spreadsheet	About 30% of the time
Duty	Flag unresolved cases to the supervisor	About 10% of the time
Required	Clear writing	Needed for answering email questions
Required	Careful recordkeeping	Needed for recording case details
Not required	A specific degree	Not needed for the duties
Not required	Years of experience	Training is provided

Five hiring words you need first

Before you ask an AI to write hiring documents, you must know these words. Each example uses Yuna's support job.

KEY IDEA

Duty

A task the person will do in the job. Example: answer customer email questions.

KEY IDEA

Requirement

A skill the person must have to do a duty. Example: clear writing, because the person answers emails.

KEY IDEA

Job-related

Connected to a duty. Age, accent, and "energy" are not job-related, so they must not be requirements.

Five hiring words you need first (continued)

Before you ask an AI to write hiring documents, you must know these words. Each example uses Yuna's support job.

KEY IDEA

Structured interview

Every candidate gets the same questions in the same order, so the answers can be compared fairly.

KEY IDEA

Scoring guide

A short table that says what an answer looks like at each score. Example: 1 = guesses an answer; 3 = says they will follow up, records the case, and asks the supervisor.

Why the AI ad was wrong

"Sounds like a normal job ad" and "matches this job" are different questions. Check each requirement in the AI ad against the duties.

AI ad requirement	Duty it supports	Result
Bachelor's degree	None (not required)	Remove
3+ years of experience	None (training is provided)	Remove
Young and energetic	None; it is about age	Remove: not job-related
Native English speaker	None; the duty needs clear writing, not a first language	Replace with "clear writing"
Strong writing skills	Answer customer email questions	Keep
Organized	Record case details	Keep; say "careful recordkeeping"

Why the AI ad was wrong (key points)

"Sounds like a normal job ad" and "matches this job" are different questions. Check each requirement in the AI ad against the duties.

KEY POINTS

What the table shows

- Only 2 of the 6 requirements are linked to a duty.
- Extra requirements make fewer people apply. Requirements about age or first language can also be unfair and can break hiring laws in many places.
- The AI was not careless. Without the duties, it copied what many job ads say.

How the three-step method fixes the ad

The instructor runs Poor Prompt 1 and Improved Prompts 1 and 2 below in front of the class and compares the answers.

KEY IDEA

Step 1 fixes the missing-duties problem

The AI writes the ad from what the person will actually do.

KEY IDEA

Step 2 fixes the extra-requirements problem

A requirement with no duty next to it is easy to see and remove.

KEY IDEA

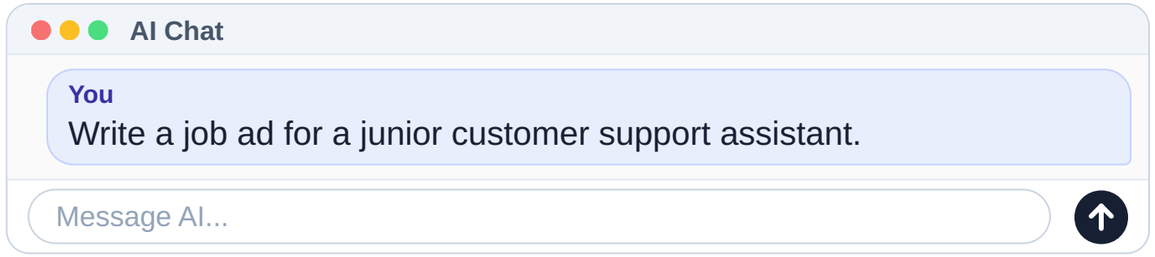

Step 3 fixes the unfair-interview problem

The same question and guide for everyone means candidates are compared on the job, not on confidence or accent.

Poor prompt 1

Same case. Compare what the prompt asks for.

POOR PROMPT 1 - DO NOT USE

WHAT THE AI OFTEN ANSWERS

A typical result

A polished ad that asks for a bachelor's degree, two or three years of experience, "excellent communication skills," and a "fast-paced, energetic" personality.

WHY IT IS WEAK

Reasons

- It gives no duties, so the AI copies requirements from typical job ads.
- It does not say what is not required, so the AI adds a degree and years of experience.
- The result can turn away good applicants, which was Yuna's problem in the first place.

Poor prompt 2

Same case. Compare what the prompt asks for.

POOR PROMPT 2 - DO NOT USE

AI Chat

You

Write an exciting job ad for a junior customer support assistant.
We want a young, energetic rockstar with a degree who fits our team culture.

Message AI...

WHAT THE AI OFTEN ANSWERS

A typical result

An ad that repeats "young," "rockstar," and "culture fit," and adds "recent graduate preferred."

WHY IT IS WEAK

Reasons

- "Young" is about age, not about the job, so it is unfair and can break hiring laws.
- "Rockstar" and "culture fit" are vague, so applicants cannot tell what the job needs.
- It still gives no duties, so the ad says nothing about the real work.

Improved prompt 1

Steps 1 and 2. Copy this prompt exactly.

IMPROVED PROMPT 1 - COPY AND SEND

AI Chat

You

We are hiring a Junior Customer Support Assistant for a small online shop.
Use only the job facts below.

Duties:
- Answer customer email questions (about 60% of the time)
- Record case details in a spreadsheet (about 30%)
- Flag unresolved cases to the supervisor (about 10%)
Required: clear writing; careful recordkeeping.
Not required: a specific degree; years of experience (training is provided).

Write a job ad under 150 words with: a two-sentence role summary, the duties, and the requirements.
After each requirement, write the duty it supports in brackets.
Do not add a degree, years of experience, age, or personality words.

Message AI...

Why it works: improved prompt 1

Each part of the prompt matters.

WHY IT WORKS

Reasons

- It gives the real duties, which fixes the missing information in Poor Prompt 1.
- The "not required" list stops the AI from adding a degree or experience.
- Writing the duty after each requirement makes every requirement easy to check.
- "Do not add age or personality words" removes the unfair words from Poor Prompt 2.
- The word limit keeps the ad short enough for applicants to read.

Improved prompt 2

Same case. Compare what the prompt asks for.

IMPROVED PROMPT 2 - COPY AND SEND

AI Chat

You

Your ad is correct. Now write one interview question for the duty "Flag unresolved cases to the supervisor." Every candidate will get the same question.

Then write a scoring guide with three levels:
1 = does not meet the skill, 2 = partly meets the skill, 3 = meets the skill well.
For each level, describe what the candidate says or does in the answer.
Score only job-related actions. Do not score accent, confidence, or appearance.

Message AI...

WHY IT WORKS

Reasons

- One question for every candidate makes the answers comparable.
- The question is linked to a real duty, so it tests the job.
- Each level describes what the candidate does, so two interviewers give the same score.
- "Do not score accent, confidence, or appearance" keeps the interview fair.

Exercise 1: Write a fair job ad

Guided practice. Follow the steps in order.

GUIDED PRACTICE

Steps

1. Open ChatGPT and start a **new chat**. Copy Poor Prompt 1 from the box above, paste it, and send it. List every requirement in the AI ad and count how many are linked to a duty. You will need the count for your report.
2. Start another **new chat**, so the first answer does not affect the second. Copy Improved Prompt 1, paste it, and send it.
3. Check each requirement in the new ad: it must have a duty in brackets. Compare with the answer key below. Cross out any requirement with no duty.
4. In the same chat, copy Improved Prompt 2, paste it, and send it. Check that each score level describes an action in the answer, and that no level mentions accent, confidence, or appearance.
5. For the Results section of your report, write the requirement count for Poor Prompt 1 (for example, "2 of 6 linked to a duty") and the requirements of the new ad with their duties.

Answer key

Use this table to check the AI.

Requirement in a good ad	Duty it supports
Clear writing	Answer customer email questions
Careful recordkeeping	Record case details in a spreadsheet
Optional: knowing when to ask for help	Flag unresolved cases to the supervisor
Not in the ad: degree, years of experience, age, personality words	No duty needs them

Exercise 2: Score candidate answers

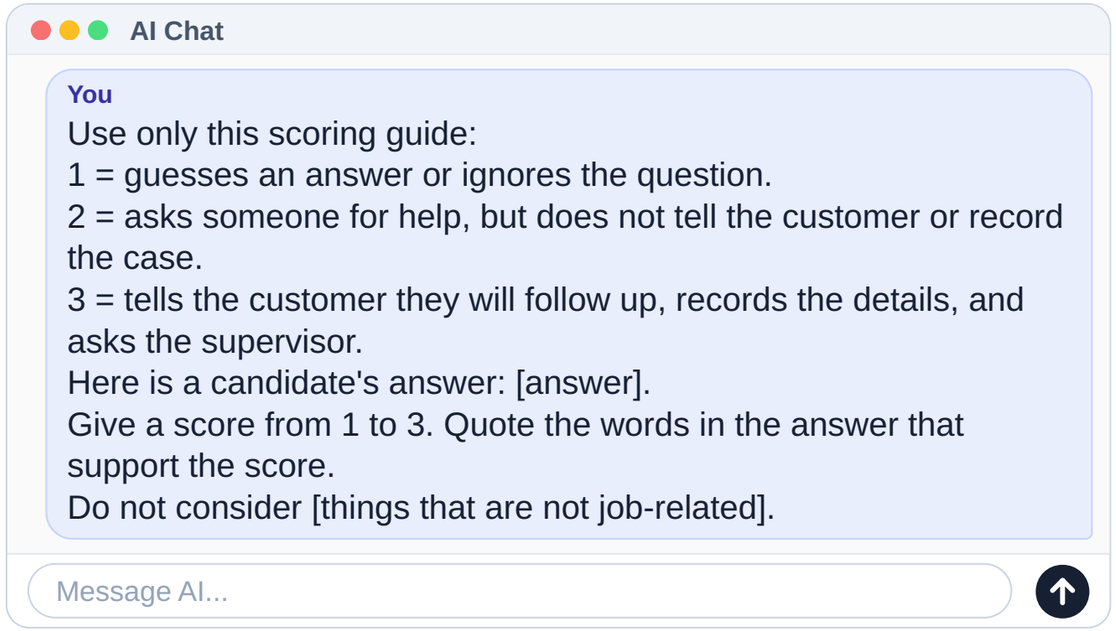

Applied practice with a template.

HOW IT WORKS

Read first

- Yuna asked every candidate the same question: "Tell me about a time you got a question you could not answer. What did you do?" Use this scoring guide and template. Replace each part in square brackets.
- **Scoring guide:** 1 = guesses an answer or ignores the question. 2 = asks someone for help, but does not tell the customer or record the case. 3 = tells the customer they will follow up, records the details, and asks the supervisor.

TEMPLATE - FILL IN, THEN SEND

Part A: Worked example (run it)

Copy and send this completed prompt in the same chat.

PART A - COPY AND SEND

AI Chat

You

Use only this scoring guide:
1 = guesses an answer or ignores the question.
2 = asks someone for help, but does not tell the customer or record the case.
3 = tells the customer they will follow up, records the details, and asks the supervisor.
Here is a candidate's answer: "A customer asked about a refund rule I did not
know. I told her I would check and reply by the end of the day. I wrote down her
order details and asked my manager."
Give a score from 1 to 3. Quote the words in the answer that support the score.
Do not consider accent, confidence, or how the candidate speaks.

Message AI...

CHECK THE ANSWER

Expected result

The score is **3**. The candidate told the customer about a follow-up ("I would check and reply by the end of the day"), recorded the details ("I wrote down her order details"), and asked the supervisor ("asked my manager").

Part B: Your turn (write it)

Fill in the template yourself and send it.

YOUR TASK

Write your own prompt

Candidate 2 answered: "I am a very confident person. When I don't know the answer, I give the answer that sounds best, and customers are usually happy." Fill in the template yourself and send it. Your prompt must include the full guide, the answer, and what not to consider.

CHECK THE ANSWER

Expected result

The score is **1**, because the candidate guesses an answer ("I give the answer that sounds best"). Sounding confident must not raise the score, because confidence is not in the guide.

Write your session report

Use Report_template.docx in Microsoft Word. Save it as FirstName_StudentID_W11_Keyword.docx and upload it to iLearn by 23:59 on class day.

SUBMIT

One report for this session

- **Introduction:** Explain Yuna's root problem (only 4 applicants in three weeks), her idea to let AI write the ad, and why the first AI ad was a problem.
- **Method:** Copy Poor Prompt 1, Improved Prompts 1 and 2, the Part A prompt, and the Part B prompt you wrote.
- **Results:** Include the requirement count for Poor Prompt 1, the new ad's requirements with their duties, the interview question and scoring guide, and the scores for both candidates with the quoted words.
- **Conclusion:** Recommend how Yuna should write her next ad and run interviews, in one or two sentences. Name one fact that supports it and one risk that remains.

How to know the work is complete

Check your report before you hand it in.

VERIFY

Success check

- You can explain in one sentence why the first AI ad could turn away good applicants, and your Part B prompt gives Candidate 2 a score of 1 with the supporting words quoted.
