Open Questions

What problem are we solving?

3 hours: 50-minute lesson, 10-minute break, 50-minute guided practice, 10-minute break, 50-minute applied practice, and 10-minute wrap-up.

SITUATION

The problem

A useful prompt buried in a chat is difficult for a teammate to reuse, understand, or check safely.

TARGET

Learning goal

Document one tested prompt clearly enough that another person can use it and recognize when human review is required.

Practice material: Use the practice material supplied in the session Markdown.

Use these supplied facts

Do not replace missing information with guesses.

CASE MATERIAL

Practice task

- Convert meeting notes into a concise team recap. A good recap must separate decisions from actions and must not invent a missing owner or deadline.

BOUNDARY

Use the supplied facts

A useful prompt buried in a chat is difficult for a teammate to reuse, understand, or check safely.

Understand the idea and apply it

Work through the explanation before comparing prompts or starting the exercise.

LEARN

Make a prompt card usable by someone else

- A prompt card should state the task, intended user, required input, copyable prompt, output format, limits, and review checks. Placeholders show exactly what a teammate must replace. Include a small example input so a new user can tell what belongs in each field.

LEARN

Make boundaries and missing information explicit

- For meeting notes, the prompt must not assign an owner or date unless the notes state one. If a field is missing, use "Not stated" and place it under Open Questions. State when the prompt should not be used, such as when notes include information the user is not authorized to share with the AI tool.

Understand the idea and apply it

Work through the explanation before comparing prompts or starting the exercise.

LEARN

Test the handoff, not just the prompt writer

- Give the card to a classmate without explaining it verbally. Ask them to use it on a new set of short notes and note confusing fields, invented claims, and missed safeguards. Compare the result with the input, revise the card once, and record what changed. A portfolio artifact should show this test and its limits, not claim that AI output is automatically correct.

APPLY

Three-step method

- Choose one prompt that solves a real repeated task; document inputs, instructions, and boundaries; have a classmate test and review it.

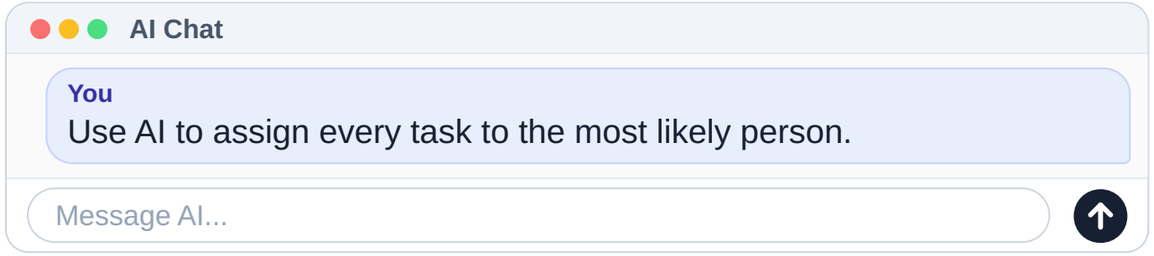

What makes a prompt weak?

These examples come from the current session scenario.

POOR PROMPT 1 - DO NOT USE

POOR PROMPT 2 - DO NOT USE

A clearer, safer prompt

Keep the source, task, constraints, and output check visible.

IMPROVED PROMPT 1 - COPY AND SEND

AI Chat

You

From {Meeting_Notes}, list decisions and actions.
For each action include only a stated owner and date; use "Not stated" when absent.

Message AI...

IMPROVED PROMPT 2 - COPY AND SEND

AI Chat

You

Return sections Decisions, Actions (Task | Owner | Due date), and Open questions.
Keep wording faithful to the notes. A human must compare names, dates, and decisions
with the source before sharing.

Message AI...

Exercise 1: Follow the steps

Use the complete case and instructions from the session Markdown.

GUIDED PRACTICE

Exercise 1: Follow the steps

- Complete the fields: task/problem, intended user, required input, reusable prompt, output format, do-not-use condition, and three verification checks. Test it on the supplied meeting notes from Session 4.1.

Exercise 2: Try a small variation

Use the complete case and instructions from the session Markdown.

APPLIED PRACTICE

Exercise 2: Try a small variation

- Give the card to a classmate without explaining it verbally. They run it on a new short set of notes and mark confusing instructions, missing safeguards, and any output error. Revise the card once.

Write your session report

Use Report_template.docx in Microsoft Word. Save it as FirstName_StudentID_W16_Keyword.docx and upload it to iLearn by 23:59 on class day.

SUBMIT

One report for this session

- Introduction: Explain why a useful prompt buried in a chat is hard for a teammate to reuse.
- Method: Copy your final prompt card with all fields completed.
- Results: Include the sample input and output, and your classmate's notes on confusing instructions, missing safeguards, and output errors.
- Conclusion: Describe the one revision you made, and include your human-review checklist.

How to know the work is complete

Check your report before you hand it in.

VERIFY

Success check

- A classmate can use the card without extra explanation, missing fields remain visible, and the review checklist catches source mismatches.
